## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24 and 32-52, drawn to a gas discharge laser apparatus comprising a laser chamber, two long electrodes, a pulse power system, a blower, and a heat exchanger, classified in class 372, subclass 57.
- II. Claims 25-31, drawn to a process of producing an elongated electrode, classified in class 372, subclass 87.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, gas discharge laser apparatus in Group I can use different discharge electrode produce by method in Group and vice versa.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
